<i>DEPARTMENT OF THE NAVY</i> SWORN STATEMENT of Paula Collins	1. PLACE Naval Air Systems Command
	2. DATE 1 July 2003

On 1 July 2003 @ 1245, I was interviewed in-person by Ms. Jean Cook and Mr. John Hays. I am a GS-13, assigned to PMA 277, Commander, Naval Air Systems Command, Washington D.C., Tel: (301) 757-4430; DSN 757; E-mail collinspj@navair.navy.mil.

Sylvia Chase, Marie Powell and I attended the SPAWAR C4I Summit in San Diego on 1-5 March 2003. We flew out on the 1st, attended the Summit the 2nd-4th and flew back on the morning of the 5th.

While in San Diego, I did have lunch with Sylvia Chase and her friend, Roy Martin, on Wednesday, 3 March at a nearby Mexican restaurant (I don't remember the name). I was anxious to get back to make a few calls before the afternoon session, but didn't want to drag Sylvia away. We'd driven over together, so I left the rental car for Sylvia, and I caught a ride back with two people I recognized from the conference (Toti Papas and Armandina Sanchez). It took a little longer to get back than I expected. We left at about 1235, and got back to the Conference Center at a few minutes before 1300. We had one drink with lunch, and Sylvia and her friend ordered another drink just as I was leaving. But I don't recall making any comment about Sylvia at all, especially a comment about her capacity to drive. She is a very responsible person, and that kind of comment would be out of character for me. I didn't see Sylvia on Wednesday afternoon at the Network Users' Working Group. I thought she was supposed to be a panelist in the working group, but she never showed up. I didn't see her at all on Thursday so I tried to call her but I couldn't get in touch with her.

I left San Diego on Friday morning. Although Ms. Powell and I traveled to the conference with Ms. Chase, we did not travel back together. Ms. Chase later told me that she got sick at lunch on Wednesday so she was unable to return to the conference on Wednesday and Thursday.

I swear (or affirm) that the information I have provided is true and complete.
